

Contents

General overview

Chapter 1	Visual function and neurodevelopment in children: from neuroscience to rehabilitation <i>Elisa Fazzi and Anna Molinaro</i>	3
Chapter 2	Visual development in childhood <i>Paolo Emilio Bianchi, Gabriella Ricciardelli, Alessandro Bianchi, Antonella Arbasini and Elisa Fazzi</i>	13
Chapter 3	Functional assessment of cerebral visual impairment in infants and children with neurodevelopmental disorders <i>Janette Atkinson and Oliver Braddick</i>	23
Chapter 4	Adult human cortical plasticity after transient visual deprivation: implications for occlusion therapy in amblyopia <i>Claudia Lunghi, David C. Burr, Roberto Caputo and Maria Concetta Morrone</i>	45
Chapter 5	The role of the motor system: from action coding to cognition <i>Giovanni Buccino</i>	59

Cerebral Visual Impairment: from diagnosis to rehabilitation

Chapter 6	Concept and overview of cerebral visual impairment: a clinical perspective <i>Geertrui Peirens and Els Ortibus</i>	71
Chapter 7	Oculomotor disturbances in children with neurological diseases <i>Silvia Mariani and Emilio C. Campos</i>	85
Chapter 8	Visual-perceptual and visual-cognitive disorders in cerebral palsy <i>Jessica Galli, Serena Micheletti and Elisa Fazzi</i>	91
Chapter 9	Developmental and acquired higher visual processing disorders in children <i>Daria Riva and Sara Bulgheroni</i>	99

Chapter 10	Neuroimaging of cerebral visual impairment in children <i>Carla Uggetti</i>	111
Chapter 11	The role of electrophysiology in the diagnosis of visually impaired children <i>Giulio Ruberto, Martina Suzani, Chiara Bertone, Rosanna Guagliano, Mauro Antonini, Sabrina Giovanna Signorini, Elisa Fazzi, Umberto Balottin and Paolo Emilio Bianchi</i>	119
Chapter 12	Visual profile in healthy full-term newborns: use of the Neonatal Assessment Visual European Grid (NAVEG) <i>Andrea Rossi, Michela Gritti, Paola Mattei, Francesco Semeraro, Gaetano Chirico, NAVEG study group and Elisa Fazzi</i>	133
Rehabilitation of visual impairments		
Chapter 13	Visual field defects and brain plasticity in children with cerebral lesions <i>Francesca Tinelli and Giovanni Cioni</i>	145
Chapter 14	A multidisciplinary and multidimensional approach to visual function in childhood: from neurovisual disorders to strategies of intervention for promoting neuropsychomotor development <i>Sabrina Giovanna Signorini, Antonella Luparia, Eleonora Perotto, Marina Zoppello, Francesco Decortes, Mauro Antonini, Chiara Bertone, Walter Misefari, Giulio Ruberto, Paolo Emilio Bianchi and Umberto Balottin</i>	155
Chapter 15	Assistive technology for rehabilitation and school inclusion of low-vision children and adolescents <i>Massimo Guerreschi, Giuseppina Giammari, Elisa Pozzoni and Renato Borgatti</i>	171
Visual disorders and neurological diseases		
Chapter 16	Disorders of the anterior segment in the syndromic child <i>Adriano Magli, Luca Rombetto, Paolo Esposito Veneruso and Elisabetta Chiariello Vecchio</i>	181
Chapter 17	Albinism <i>Roberto Caputo</i>	189
Chapter 18	Acquired nystagmus <i>Roberto Salati</i>	197
Chapter 19	Perceptual visual disturbances and epilepsy <i>Renzo Guerrini and Carmen Barba</i>	203
Chapter 20	Congenital disorders of the optic nerve <i>Paolo Emilio Bianchi, Chiara Bertone, Martina Suzani, Alessandro Bianchi and Gabriella Ricciardelli</i>	209
