Erratum : In the abstract and in the Case study section we state that whole-exome sequencing was significant for a heterozygous deleterious mutation c.400C>T (p.R13X) in *WDR45* gene. There was a typographical error and the mutation designation in the abstract and in the text should be c.400C>T (p.R134X). The publisher deeply regrets this error. The original article to which this Erratum refers was published in *Epileptic Disord* 2015 Dec; 17(4): 467-72. doi: 10.1684/epd.2015.0784.
